Nothing Frequency

Autopilot Off

There's static in the atmosphere
A constant interference that is killing me
I'm losing the connection here
When all the frequencies are down
And this silence seems so loudThat's why
This system, it shorted out
Programmed restraint before the shutting down
This system shorted out
Memory fails during the crashing downAnd I'm screaming at the satellites
And I'm watching all the screens go black in front of me
I'm sending out a prayer tonight
'Cause all the frequencies are down
And this silence seems so loudThat's why
This system, it shorted out
Programmed restraint before the shutting down
This system shorted out
Memory fails during the crashing downAnd as it's starting to fade out
And as we're heading underground
Well, there's a pessimistic side of me
That knows that this might never turn itself aroundThis system, it shorted out
Programmed restraint before the shutting down
This system shorted out
Memory fails during the crashing downThis system, it shorted out
Programmed restraint before the shutting down
This system shorted out
Memory fails during the crashing down
