

# Nothing Frequency

## Autopilot Off

There's static in the atmosphere  
A constant interference that is killing me  
I'm losing the connection here  
When all the frequencies are down  
And this silence seems so loudThat's why  
This system, it shorted out  
Programmed restraint before the shutting down  
This system shorted out  
Memory fails during the crashing downAnd I'm screaming at the satellites  
And I'm watching all the screens go black in front of me  
I'm sending out a prayer tonight  
'Cause all the frequencies are down  
And this silence seems so loudThat's why  
This system, it shorted out  
Programmed restraint before the shutting down  
This system shorted out  
Memory fails during the crashing downAnd as it's starting to fade out  
And as we're heading underground  
Well, there's a pessimistic side of me  
That knows that this might never turn itself aroundThis system, it shorted out  
Programmed restraint before the shutting down  
This system shorted out  
Memory fails during the crashing downThis system, it shorted out  
Programmed restraint before the shutting down  
This system shorted out  
Memory fails during the crashing down
