Built to Last

Ann Beretta

Too right, too left
In the middle is a safety bet
But you know I won't let me let you down
Half mast, beat past
I might laugh first but I won't laugh last
And you know I won't let me let you downBuilt to last
Living life and going nowhere
Way too fast
To bring us down
Built to last
Living life and going nowhere
Way too fast
To break our fall
And lose it allRight place, wrong time
False start on a starting line
And you know I won't let me let you down
A foot in a hole I know is too deep
A price on my head I know is too steep
But you know I won't let me let you downBuilt to last
Living life and going nowhere
Way too fast
To bring us down
Built to last
Living life and going nowhere
Way too fast
To break our fall
And lose it allToo right, too left
In the middle is a safety bet
But you know I won't let me let you down
Right place, wrong time
False start on a starting line
And you know I won't let me let you downBuilt to last
Living life and going nowhere
Way too fast
To bring us down
Built to last
Living life and going nowhere
Way too fast
To break our fall

And lose it allSing loud
Another for the underground
Sing loud, sing proud
Sing loud
Another for the underground
Sing another for the underground
