

# Chemistry

## Analogic

Oh, oh, oh, what's the chance of you and me?

The two of us in a make believe

3-D movie let's subtract the math

And talk about chemistry

She still counts on her fingers sometimes

But she looks oh so fine by my side

Well, isn't she something?

I just can't stop humming, no

And maybe, girl, you rock my world

Flip turn it upside down and inside out

Feeling just fine like we should alright

Rolling out of bed just to do it all again

Grab my shoes and walk right out the door

Girl, I couldn't ask for more

Oh, oh, oh, let's forget about math and history

The Milky Way, the galaxy

The gravity that's pulling you

Like glue right towards me

And maybe, girl, you rock my world

Flip turn it upside down and inside out

Feeling just fine like we should alright

Rolling out of bed just to do it all again

Grab my shoes and walk right out the door

Girl, I couldn't ask for more

'Cause the gravity keeps happening

To disappear when you are near

But you seem to be what's making

Me miss a beat

Maybe, girl, you rock my world

Flip turn it upside down and inside out

Maybe, girl, you rock my world

Flip turn it upside down and inside out

Feeling just fine like we should alright

Rolling out of bed just to do it all again

Maybe, girl, you rock my world

Flip turn it upside down and inside out

Feeling just fine like we should alright

Rolling out of bed just to do it all again

Grab my shoes and walk right out the door  
Yeah, girl, I couldn't ask for more
