

All Star Jam

Front End Loader

Uhhhhhh!

We saw this band the other day
That we think will go far
They had Jesus playing on the lead guitar
Satans playing bass and the drummer
came from outer space
And it looks to me
I think you'll see
We've found an all star jam

The all star jam
The all star jam
The all star
JAM!

And so we opened up our minds
I guess we found our mission
Grabbed our guitars
And rolled up to the old audition
We played a few songs with the band
And Jesus said "hey listen man...
You guys are fucking great,
why don't I let you join our all star jam?"

The all star jam
The all star jam
The all star
JAM!

And so we toured and
got a little older, little wiser
Satan smoked the cones
And Jesus finished off the wine
All in all it's just another
moan in my expression
I don't know if....

The all star jam

The all star jam

The all star

JAM!
