Rubik's Cube

Athlete

The world is too heavy, too big for my shoulders Come take the weight off me now Thousands of answers to one simple question Come take the weight off me now Oh, I'm like a kid who just won't let it go Twisting and turning the colors in rows I'm so intent to find out what it is This is my Rubik's cube, I know I can figure it out Lost in the playground, late night nostalgia Open the sky for me now Friends round the fire outside in December Open the sky for me now Oh, I'm like a kid who just won't let it go Twisting and turning the colors in rows I'm so intent to find out what it is This is my Rubik's cube, I know I can figure it out Credits roll over the edge of horizons That I haven't discovered yet Oh, I'm like a kid who just won't let it go Twisting and turning the colors in rows I'm so intent to find out what it is This is my Rubik's cube, I know I can figure it out Oh, I'm like a kid who just won't let it go Twisting and turning the colors in rows I'm so intent to find out what it is This is my Rubik's cube, I know I can figure it out
