

Cherish

Dana Glover

Carefree is what we claim we wanna be
Free to live the life that we have found
Shame on you and shame on me
It's living when we're laying our lives down
People hear me when I say
No one knows the hour or day
Be prepared to live your way
When everything could change
Cherish every moment of your life
Don't let the days of good and bad just pass you by
And cherish every moment you're together
Cause you will never know
When your days are gone
Hold onto the ones you love
They're gone, within the twinkle of an eye
People hear me when I say
No one knows the hour or day
Be prepared to live your way
When everything could change
Cherish every moment of your life
Don't let the days of good and bad just pass you by
And cherish every moment you're together
Cause you will never know
When your days are gone
People hear me when I say
No one knows the hour or day
Cherish every moment
Cherish every moment
Don't let the days of good and bad just pass you by
And cherish every moment you're together
Cause you will never know when your days are gone
Don't let the days of good and bad just pass you by
And cherish every moment you're together
Cause you will never know
When your days are gone
When your days are gone
When your days are gone
They're gone, they're gone
Cherish every moment of the day now (every moment of your life)
Cherish every moment of the day now,
cherish all your life
Cherish every moment of the day now, cherish all your life
Cherish every moment of the day now, cherish all your life
Cherish yeah yeah
Ever
