

# Is There Anyone Out There?

## Duran Duran

I never found out what made you leave Another day's over just an hour to go Well I tried to phone last night but you never answered Just left me ringing on the line Outside is there anyone out there anyone else outside Woah outside love is there anyone out there anyone else outside My face in the mirror shows a break in time A crack in the ocean, it does not align I tried to sleep last night, but I've caught ya dreaming About days we used to wonder away Look out of the window maybe you can call by my name Woah outside love is there anyone out there anyone else outside Another night over babe another light comes on in vain Outside is there anyone out there anyone else outside Well I tried to phone last night but you never answered You just left me ringing in the air Anyone out there (anyone out there) oh, oh Anyone out there (anyone out there) oh, oh Is there anyone out there (anyone out there) oh, oh Anyone out there (anyone out there) oh, oh Anyone out there (anyone out there)
