

Utopia

Socialburn

I never thought it'd be possible to find someone again
I searched long and hard for someone I didn't know
Instead of my best friend
Now I have her in my arms and I've been trying to say
Those three words won't come out right, so I'll just say
You take me to a place with you
That only I feel safe to say
That I'm in love with you
In your arms feels like no harm could be done to me
The way your chin rests on my head, your love it captures me
Every second of the day I wish to spend it with you
Now I know the reason I never loved before
Was to save all my love for you
You take me to a place with you
That only I feel safe to say
That I'm in love with you
So don't go away, I need you to stay
To hear me say that I'm in love with you
You take me to a place with you
That only I feel safe to say
That I'm in love with you
You take me to a place with you
That only I feel safe to say
That I'm in love with you
