

All I Ever Wanted

Son By Four

Save every little kiss for me tonight
Like the one you gave me once upon a time
And when the moon and stars come out to shine
I'll tell them, each and every one of them you're mine
Open the little box of memories
Of all the times you gave yourself only to me
Just when I thought our love was dead and gone
The story turns a page to carry on
'Cause you're everything I ever wanted
All I ever wanted, all I ever wanted
Since the day that you went away
I've been alone and broken hearted
But what my heart really wants to know
If you're gonna stay or if you're gonna go
And I'm telling you please if you're coming back into my life
Don't ever say goodbye
Que t
