

# Seasons Change

## Anastacia

Cradle the weight of your life  
You can survive what lies before you  
It's only a matter of time  
Before the night turns into day Oh, it should feel incredible, whoa  
To know you're not alone, uh  
Just look in my eyes  
Whoa, just look in my eyes I said, happy turns to sad  
And sometimes life gets bad  
And things get rearranged  
Nothing stays the same It just never ends, here we go again  
One thing still remains  
Seasons seasons change C'mon yeah, seasons change  
C'mon yeah, seasons change  
C'mon yeah, seasons change Are you scared of today, running away  
I can see through you  
It feels like an eternal haze, it's only a faze  
It's all in your mind Oh, when you feel invisible, uh  
Just know you're not alone  
Just look in my eyes  
Just look in my eyes Happy turns to sad  
And sometimes life gets bad  
And things get rearranged  
Nothing stays the same It just never ends  
Here we go again  
One thing still remains  
Seasons seasons change You can feel the air start to change  
When you're walkin' out in the rain  
And the colors inside your brain started fading  
'Til the winter is washed away  
And nothing really feels the same  
When sunlight's in your eyes, you feel alive What I really want  
What I really want  
What I really want  
What I really want  
I said, yeah, yeah, yeah Happy turns to sad  
And sometimes life gets bad  
And things get rearranged  
Nothing stays the same It just never ends  
Here we go again

One thing still remains  
Seasons seasons changeIt just never ends  
Here we go again  
One thing still remains  
Seasons seasons changeIt just never ends  
Here we go again  
One thing still remains  
Seasons seasons changeC'mon yeah, seasons change  
C'mon yeah, seasons change  
C'mon yeah, seasons changeThe seasons seasons change  
Uh, yeah seasons change  
Uh, yeah seasons changeHappy turns to sad  
And sometimes life gets bad  
And things get rearranged  
Nothing stays the sameIt just never ends  
Here we go again  
One thing still remains  
The seasons seasons changeYeah, c'mon
