

The Christmas Song

Weezer

You told me you would be here by my side
Warming my heart on this cold winter's night
Here I sit waiting beside the tree all by myself
(By myself) You told me you would move Heaven and earth
Cheering my spirits with laughter and mirth
Here I sit waiting beside the tree all by myself
(By myself) Oh, could you ever know how much I care?
Could you ever know that out somewhere
There's a boy who really hurts? Since I've found you
I've found a girl, I've found a thorn
I've found a queen, now I am warm Oh, could you ever know how much I care?
Could you ever know that out somewhere
There's a boy who really hurts? Since I've found you
I've found a girl, I've found a thorn
I've found a queen, now I am warm You told me you would move Heaven and earth
Cheering my spirits with laughter and mirth
Here I sit waiting beside the tree all by myself
(By myself) Here I sit waiting beside the tree all by myself
