Afterlife (Frank Pole Remix)

Greyson Chance

We talk to the deep of the night
Moving by cigarette light
Waiting for something to spark
But you left me in the dark
Mistakes that you made in the past
Cutting through you like they're glass
There are no words that can paint
The longing in your face
I just want to hold you, keep you in my worldBut you wanted to go higher, take the chance and explode
Thought I was more than the afterlife, thought I was more than the
You're at the edge of your desire, left the story untold
Thought I was more than the afterlife,
Thought I was more than the, more than the, more than theLove's never clear in the haze
But you feel good in a sway
Calling me up for a ride
I pick you up, we fight
I say the future is yours if you choose
And mine won't exist without you
Nothing I say hits your heart,
You keep me in the darkI just want to hold you, keep you in my worldBut you wanted to go higher, take the chance and explode
Thought I was more than the afterlife, thought I was more than the
You're at the edge of your desire, left the story untold
Thought I was more than the afterlife,
Thought I was more than the, more than the, more than the(x2)
Don't tell me in my sleep,
Don't tell me in my dreams
Don't tell me what you see
Show me with a touch
Show me with some love
Show me you'll stay with meBut you wanted to go higher, take the chance and explode
Thought I was more than the afterlife, thought I was more than the
You're at the edge of your desire, left the story untold, Thought I was more than the afterlife,
Thought I was more than the, more than the, more than the
