

# Just Want To Be With You

Chris Rea

Deep inside the burning histories  
All along this lonesome road  
The wheels that turn upon what used to be  
In passionate memories, overload  
The truckhouse standing on the freeway  
A neon ambush in the sun  
The ices of dogma way down in the subway  
It's so hard to tell who's on the run  
The hell-hound blizzards of uncertainties  
Are the only things that are coming through  
And I just want to be with you  
There's not a lot I can do  
Just keep coming through

Be with you  
The smile that burned down those old rusting gates  
Those eyes that danced into my soul  
And all along this life-long motorway  
Bad news upon the radio  
The nervous fingers on the safety-catch  
Decide the fates to of you and me  
Stuck in the middle of this whole shooting match  
Man this sure ain't no place to be  
The good guys sent to save  
The good and free  
All scratch their heads and looked confused  
And I just want to be with you
