

The Fence

Surrogate

So let's stay, I want to help you pass the time
I want to tie your hands and cover up your eyes
When it's dark, we can try our hands at
Finding the road out of here, baby when it's dark'Cause they might be around
Maybe we could stay
And they might put you down
Baby, we should stayPlease, bear in mind what people say
About where grass is green
I know that I'll be happy there
But the fence is killing me, ohSo let's stay and do the things we'd never do
And say the things we'd never say ordinarily
I don't think I want to be anywhere
Anywhere but right here, at least for right now'Cause they might be around
Maybe we could stay
And they might put you down
Baby, we should stayPlease, bear in mind what people say
About where grass is green
I know that I'll be happy there
But the fence is killing me
