

Lo Noise

Walter TV

a low noise
in the dark woods
in the even darker skys
with brighter stars
making high frequencies
buzzing around
the blue sky holds you in
while the night sky
lets you outnow that your out
what are you going to do?
who are you going to think is cool?
how are you going to wear your hair?
fuck you
do you do what you should do?
are you clear on whats good for you?
do you waste your time too?
get over it
i know that word likea low noise
in the dark ocean
is how i spend my days
