

In the Mist She Was Standing

Opeth

Seven milestones...
Under a watching autumn eye
Contorted trees are spreading forth
The message of the wind With frozen hands I rode with the stars
With anger the wind blew
Giving wings to my stallion
Clouds gathered across the moon
Blazing, the white light Passing the lake I know so well
I am near, yet so far away Arrival...
I saw her shadow (standing) in the darkness
Awaiting me like the night
Awaits the day
Standing silent smiling at my presence
A black candle holds the only light Darkness encloses
And the candle seems to expire
In her cold, cold hand
And as a forlorn soul
It will fade away Touching her flesh in this night
My blood froze forever
Embraced before the dawn
A kiss brought total eclipse And she spoke
Once and forever
I am so cold
In mist enrobed the twilight
She was standing...
