

# Shooting Star

## Expatriate

Save my heart  
For all of time  
If you're going to open up  
Well, come and pay the price And take this love  
Take it to the streets  
Burn down everything  
Till you see it all complete My body, it moves  
Like a shooting star  
My body, it moves  
Like a shooting star Underneath the stars  
They were fading into life  
Love was full of slaughter  
We moved out of the night My body, it moves  
Like a shooting star  
My body, it moves  
Like a shooting star My body, it moves  
Like a shooting star  
My body, it moves  
Like a shooting star  
Star, star, star
