

Everything Changes (Demo)

Gungor

The world is a ship
Is a wave
Feel it quake and twirl
The stars all fade into the day
Everything changes
Changes my love We're not the same
You and I
Both have changed my love
The tides have turned, that's how it goes
everything changes, nothing can change my love The days, they are short
Like a wave on a shore my love
our lives will fade into the night
everything changes
changes my love For now, just lie here in my bed
I'll kiss your mouth, we'll feast on love
everything changes, but nothing can change my love
