## Handjobs for the Holidays

## **Broken Social Scene**

Let me take you on, we'll get high just a little

Try to surface the calm, we don't come inside

Has it brought you closer to this?

Yeah, has it brought you closer to this?And is it coming alive? Try to believe it

Was the question a point? I don't want your love

Has it brought you closer to this?

Yeah, has it brought you closer to this?We've got eyes that leave us in places we don't see

We've got eyes that leave us in places we don't seeLet me take you on, we'll get high just a little

It kinda takes the joy away, we don't come at all
