

Come Around

Slightly Stoopid

We searching for the sun moving to the door
Time is moving on and we heading down the road
Anywhere you want say we run down with the bros
That's how it goes any time the dance come bout
So what we want so much more to do but when
We moving on we will always remember you
Another day go down see them go through
Now we at your door there's nothing here but you
So when we come around them word on the
Streets always looking for something it's
Always going on the lights on the stage
While the people them always jumping
But nobody know your name in different
City you see people have change
Say every man needs something from this life
Everything we work for all this time don't seem
So wrong until it's right in front of you under the
Light is it you outside we looking for one or two
Or three or maybe more well life is rough and
Rocky road never troubles turn down the lights
And ring on the night
So when we come around them word on the
Streets always looking for something it's
Always going on the lights on the stage
While the people them always jumping
But nobody know your name in different
City you see people have change
Yea ooh moving all day and night you see
Them cooling down the streets every day
They go until them rock and roll some of
Them rock to soca if they moving fast or
Slow ready to go and them living up them
Psalms most people don't know the time
And think they know so stay clear and know
What you need is an open soul just let it stay
Under control and everything will follow you
So when we come around them word on the
Streets always looking for something it's
Always going on the lights on the stage
While the people them always jumping
But nobody know your name in different
City you see people have change
