Friend Like Me

Wayne Wonder

Pinky promise

Its gonna be alright

Its gonna be alright

Its gonna be alright

Its gonna be alrightMany late nights when shes all alone

She always call me up on the phone

Begging me to come and spend the night

Because she wants to rub me in her honeycombWhat she need is just a friend like me

What she need is just a good friend like me

What she need is just a friend like me

What she need is just a good friend like meTold her friends that I treat her right

And I love to vibe all day

Feels so good just to be around

A lotta times she dont want me to go awayWhat she need is just a friend like me

What she need is just a good friend like me

What she need is just a friend like me

What she need is just a good friend like meAfter all you cant deny

I took her where her feels

Cant go on, you cant pretend

Thats why shes asking me againWhat she need is just a friend like me

What she need is just a good friend like me

What she need is just a friend like me

What she need is just a good friend like meIts gonna be alright

Its gonna be alrightWhat she need is just a friend like me

What she need is just a good friend like me

What she need is just a friend like me

What she need is just a good friend like meWhat she need is just a friend like me

What she need is just a good friend like me

What she need is just a friend like me

What she need is just a good friend like meWhat she need is just a friend like me

What she need is just a good friend like me

What she need is just a friend like me

What she need is just a good friend like meWhat she need is just a friend like me

What she need is just a good friend like me

What she need is just a friend like me

What she need is just a good friend like me True
