

# White Lines & Red Lights

## Between the Trees

Late night, driving home together  
And at red lights we press our lips together  
And we're holding tight now slow it down now  
Let's take our timeLet the moment last  
Until it feels right  
Holding back  
And not getting to carried away  
Let the music fade'Cause you are the brightest star  
I'm in love with who you are  
And you are the brightest star  
I'm lost without your loveWe are in each others arms  
Just like a movie scene  
'Cause as we're leaning in  
The light decides to turn green  
Me and you togetherThis is getting better  
Just butterflies won't do  
I don't want just red lights  
I want more of these nights  
'Cause baby I love youYou and me is what matters most  
It's not the intimacy that brings me  
Closer to you
