Classic Situation

Yonder Mountain String Band

Sleep on it, see if it makes a difference in the morning
Go to work, get through the day and try not to remember
Even if we had something to say,
Would you hold it dear, would it fly away with you, with youLong ago, it felt like we were both so much younger
Here we are a repeat of a classic situation
Did you build us up just to say how high?
Would you let me down?
Even notice that I was with you, with you
There you go, gone again without an explanation
So anyway get through the day and try not to remember
Even if we found nothing to say
Would it finally hide all the reasons to stay with you, with you
