Starlight

Accept

Know the bright lights of Hollywood Movie towns, a phony world Seen a few nights of wonder Seen a few nights of hellWalking down the foggy streets of London town Now I know it well Every light in the world is nothing To the light we know so wellStarlight, shining bright Starlight, rightHad a bit of life in high society The slums have seen me, too And the rich and poor would wonder At somethin' old and newSee it every night goin' slowly 'round Can't you see it's true Out there every man is equal Way out there in the blueStarlight, shining bright StarlightTake it all the way all night long Twinkle on, you stars I feel my brain is blinded I wonder what you are Starlight, shining bright
