

complicity

Vegetable G

I have no name my face a blur
I speak only to answer them
White noise becomes a voice
I hear it constantly I dare not break the circuit
I rest only for a short time
This time I promise I won't give up My vision now is incomplete
I am affected by the warmth
A change of tone unusual sound
Is this the time to decline I dare not break the circuit
I rest only for a short time
This time I promise I won't give up I have no right to let it go
I have no right to do so
I have no right to let it go
I have no right to do so They control the circuit
Embodiment of what I've done
If I waver from this circle
A second pass and then I'm found He who walks behind me
He once saw the morning sun
He once saw the morning sun I dare not break the circuit
I rest only for a short time
This time I promise I won't give up I have no right to let it go
I have no right to do so
I have no right to let it go
I have no right to do so
