

Blood, Tears & Gold

Hurts

I never thought I could forget you
I never thought I'd be the man I am now
It's 20 seconds since I left you 'Cause I could never be your lover
I found another girl to mess me 'round
So you don't get to make me suffer Look into my eyes
There's really nothing left to lose
But now I know
That I'm never coming back to you Love grows cold
Blood, tears and gold
Won't make it any better I never let you down, baby, baby
I never let you down, baby, baby
And it won't get any better
Blood, tears and gold It's 20 seconds since I've left you
And I remember why I never looked back
I got no reason to forgive you, oh I see it in your eyes
The suffering, it hides the blue
But I know that it's never gonna
Hide the truth, the truth, baby Love grows cold
Blood, tears and gold
Won't make it any better I never let you down baby, baby
I never let you down baby, baby
And it won't get any better
Blood, tears and gold Love grows cold
Blood, tears and gold
Won't make it any better When love grows cold
Blood, tears and gold
Won't make it any better I never let you down baby, baby
I never let you down baby, baby
And it won't get any better
Blood, tears and gold Won't make it any better
I never let you down
I never let you down, baby
Blood, tears and gold
