

Flammable

Biffy Clyro

[Verse 1]

All of the things I said shouldn't fail you now

Unless you're looking for a miracle

Out of the light, we lost you in the crowd

You'll never find us a miracle[Pre-Chorus]

You can fail me now

You can leave me now

You can let me down

But you'll never know...

[Chorus]

All of your self control

Denies you the light, puts you in a hole

How come that no-one knows

You have a heart?

Do you have a soul?

You need someone to tell

You need someone to hold

If this is love then what are you waiting for?

You need someone to tell

You need someone to hold

If this is love then what are you waiting for?[Verse 2]

How do we light the torch and pass it round?

We need something that's flammable

You and I conspire and split the ground

This is oh so critical[Pre-Chorus]

You can fail me now

You can leave me now

You can let me down

But you'll never know...[Chorus]

All of your self control

Denies you the light, puts you in a hole

How come that no-one knows

You have a heart?

Do you have a soul?

You need someone to tell

You need someone to hold

If this is love then what are you waiting for?

You need someone to tell

You need someone to hold

If this is love then what are you waiting for?[Guitar Solo][Chorus]

You need someone to tell

You need someone to hold

If this is love then what are you waiting for?

You need someone to tell

You need someone to hold

If this is love then what are you waiting for?
