

I Did It For You

Backstreet Boys

last night on the road with my head spinning
.. ahead for a dead end but i turned it around
i did it for you
you
i did it for you
you
i did it for you
you
i did it for you
you
never thought for once that it will end up like this before
always thought i will be the one driving
attention and conscious size i am .. the dropping line
completely out of control
out of me head i was starring ..give it gas
just when i ran into you
girl you turned my life around
i know ..sound
where would i be without you
probably i would be
last night on the road with my head spinning
.. ahead for a dead end but i turned it around
i did it for you
you
i did it for you
you
i did it for you
you
i did it for you
you
i had my back ?s bag feeling like love wasn't fair
i drove some .. and nothing was there
i swear this pain is killing me
i know it?s eating all of me
i had a .. and i am on the back street
just to realize the world don?t revolves around me
i was .. how could you ever loved a ..
girl i was so lost

last night on the road with my head spinning
.. ahead for a dead end but i turned it around
i did it for you
you
i did it for you
you
i did it for you
you
i did it for you
you
i know that everything is true
it's all about you
the only .. i had to turn around
(repeats)
