

# Warrant

## Foster the People

I've been judged, I've been a bug unknown  
Yeah I know all about it but my heart is strong I've been away, been running to save my head  
Yeah the warrant's out and I'm almost dead  
I won't say what I've already said Got to get away, yeah the warrant's on my head  
Got to get away, they want me alive or dead I've thought a lot about the way that they fight  
Come through the phone lines  
Not man enough to face me  
I can't stop or argue about what they say  
Yeah, the warrant's out  
And I'm not gonna pay  
I said what I'm gonna say Fear is like a fake friend  
It warms you up and takes you in  
You mouth the words but no sound comes out  
Fear is like your best friend  
Manipulates and takes you in  
You mouth the words... no sound again  
But you don't know better, you don't know better
