Eternity

Gemini Syndrome

We take for granted all the beauty and the life
It's not supposed to be that way
With all the torment and the struggle and the strife
Its up to all of us to see the light againI wish I had nothing to sayEveryday is a new dream
A new reality
Everything existing
More than one for us to see
Welcome to eternityWe make assumptions that are only based on lies
Because of the trauma that we see
So take a deep breath, then just open up your heart to hear
The universe in harmonyI wish I had nothing to sayEveryday is a new dream
A new reality
Everything existing
More than one for us to see
Welcome to eternityGive yourself the opportunity to see free
Ride yourself of insecurity and we become oweHow could you have nothing to say?Everyday is a new dream
A new reality
Everything existing
More than one for us to see
We're becoming something greater than infinity
Welcome to eternityEternity
