

The (Shipped) Gold Standard

Fall Out Boy

Sometimes I wanna quit this all and become an accountant now
But I'm no good at math and besides the dollar is down
Plant palm trees on Lake Michigan before it gets cold
I gotta feel the wind chill again before I get old I wanna scream I love you from the top of my lungs
But I'm afraid that someone else will hear me You can only blame your problems on the world for so long
Before it all becomes the same old song
As soon as we hit the hospital, I know we're gonna leave this town
And get new passports and get get get get get out now All the yes men said "no comment"
My mouth going the wrong way and all the cards got its no win
The time my dad caught me a horseshoe crab
And I asked him if throwing it back into the sea will bring our luck back I wanna scream I love you from the top
of my lungs
But I'm afraid that someone else will hear me You can only blame your problems on the world for so long
Before it all becomes the same old song
As soon as we hit the hospital, I know we're gonna leave this town
And get new passports and get out now Tell that boy I'll leave you alone now
Like a stove, I'll turn my love down
Supra and the prophet are both in the business of souls I wanna scream I love you from the top of my lungs
But I'm afraid that someone else will hear me I wanna scream I love you from the top of my lungs
But I'm afraid that someone else will hear me You can only blame your problems on the world for so long
Before it all becomes the same old song
As soon as we hit the hospital, I know we're gonna leave this town
(know we're gonna leave this town)
And get new passports and get get get get get out
Get get get get get out now
