

Cold Kisses

Steve Holy

Under the stars, Spanish guitars
Sing the Santa Maria outside my room
The music's playing on a sweet bougainvillea breeze
Romantically, oh, but not for me
There's a ring of ice around the moon
And it's making me shiver
It seemed so warm when I had you
But all the others I've known leave me chilled to the bone
Baby, since you've been gone, all I'm left with is cold kisses
My pride has tried to build a fire that's as bright as your memory
But I can't give what has been given
I just don't have it in me now
I'm all closed down and the fire's burned out
There's a ring of ice around the moon

And it's making me shiver
It seemed so warm when I had you
But all the others I've known leave me chilled to the bone
Baby, since you've been gone, all I'm left with is cold kisses
Like a rose in the snow
That won't bloom and can't grow
There's a ring of ice around the moon
And it's making me shiver
It seemed so warm when I had you
But all the others I've known leave me chilled to the bone
Baby, since you've been gone, all I'm left with is cold kisses
Cold kisses, cold kisses
