

When We Were Queens

Blue Meanies

when we were queens looking pretty pure and plasticine the most proper scene that you have ever ever seen
when we wore wigs lipstick and 34 Cs and our accessories were all made of polyurethane come on girls your
supterstars that's what you are you're royalty powder power powder power touch up the deformities push up
bras and kittie calls shine that spotlight right on me caught on film by paparazzi gracing magazines eyes were
open necks were broken trying to catch a glimpse of me come on girls you're supterstars that's what you are
you're royalty come on girls the torch is lit it's boy meets girl majesty queens that day we were queens that day
queens for a day spike heeled hearts we've left behind are lost in memory pull up tight cause in your sights
another casualty to squeeze and hug ans slowly love and swallow up with tea today's your day you are woman
you are royalty come on girls you're superstars that's what you are you're royalty come on girls the torch is lit
it's boy meets girl majesty queens that day we were queens that day queens for a day when we were queens pure
and plasticine
