

Make a Run For It

Hit the Lights

Let's leave these lives tonight.
You can find us by the trail of our insides.
They were left at the scene of the crime.
We've tampered with evidence,
Finger prints were left behind. So let's cut, cut, cut to the chase.
We need to get, get, get our story straight.
This is what we were hoping,
Covers blown wide open,
We can make a run for it,
We can make a run for it. We've got this down to a science baby.
Don't be afraid, be very afraid.
We've got this down to a science baby
We don't make mistakes, we don't intend to make. Complex, calculated, overlooked, and underrated.
We've got this down,
We've got this down. So let's cut, cut, cut to the chase.
We need to get, get, get our story straight.
This is what we were hoping,
Covers blown wide open,
We can make a run for it,
We can make a run for it. We've got this down to a science baby.
Don't be afraid, be very afraid.
We've got this down to a science baby
We don't make mistakes, we don't intend to make. We'll lure you in,
Set you up,
To take our fall,
And now it's over. (Complex, calculated, overlooked, and underrated.)
We'll lure you in,
Set you up,
(We've got this down,)
To take our fall,
(We've got this down,)
And now it's over,
Now it's over. We've got this down to a science baby.
Don't be afraid, be very afraid.
We've got this down to a science baby
We don't make mistakes, we don't intend to make. We've got this down to a science baby.
Don't be afraid, be very afraid.
We've got this down to a science baby
We don't make mistakes, we don't intend to make. We've got this down to a science baby.

(Don't be afraid.)
Don't be afraid, be very afraid.
We've got this down to a science baby.
(We don't make mistakes.)
We don't make mistakes, we don't intend to make.
[repeat till fade]
