My Skin

Elessar UK

The street lights lighting the way through this but I can't find my feet anymore
And time flies faster than I can and no one here is keeping score

This home away from home
And we've been raised to live it
We're made from no it's time to show
But this is what we believe in

Fade in the comfort of my own skin
If this isn't life then I don't wanna breathe in
I'm tired of answers living a lie
We're taught a progression that's out of our hands
We do what we want where are we do what we can
This is adventure then I want to know, is this is my own

Wide eyes, seeing that things have changed but I'm keeping my feet on the floor
My life was a victim of confidence that no one else can take anymore

This is home away from home
And we've been raised to live it
We're made from no it's time to show
That this is what we believe in

Fade in the comfort of my own skin
If this isn't life then I don't wanna breathe in
I'm tired of answers living a lie
We're taught a progression that's out of our hands
We do what we want where are we do what we can
This is adventure then I want to know, is this is my own

This is home for us it's all we know
This is home for us it's all we know
This is home for us it's all we know
This is home for us it's all we know

This is home for us it's all we know
This is home for us it's all we know

Fade in the comfort of my own skin
If this isn't life then I don't wanna breathe in

I'm tired of answers living a lie
We're taught a progression that's out of our hands
We do what we want where are we do what we can
This is adventure then I want to know, is this is my own
