

I've Got This Friend

[Faith Hill](#)

I've got this friend who is lonely
She's afraid she'll never find her one and only
A little shy but she can be fun
If the right guy came along
Would you know someone I've got this friend and it sounds crazy
But he's been feeling that way too a whole lot lately
And interested, oh I'm sure he'd be
I can almost speak for him
He's that close to me Maybe in each other
They might find the lover
They've been missin' until now
They'd trust the judgment of
Two friends like us who care so much
Can we get them together somehow I've got this friend
Yeah, I think I know her
My arms can almost feel the way he'd hold her
It's like he's here when you describe him
And if he's anything like you I'm sure she'd like him Maybe in each other
They might find the lover
They've been missin' until now
They'd trust the judgment of
Two friends like us who care so much
Can we get them together somehow Can we get together I've got this friend
