I've Got This Friend

Faith Hill

I've got this friend who is lonely She's afraid she'll never find her one and only A little shy but she can be fun If the right guy came along Would you know someonel've got this friend and it sounds crazy But he's been feeling that way too a whole lot lately And interested, oh I'm sure he'd be I can almost speak for him He's that close to meMaybe in each other They might find the lover They've been missin' until now They'd trust the judgment of Two friends like us who care so much Can we get them togethersomehowI've got this friend Yeah, I think I know her My arms can almost feel the way he'd hold her It's like he's here when you describe him And if he's anything like you I'm sure she'd like himMaybe in each other They might find the lover They've been missin' until now They'd trust the judgment of Two friends like us who care so much Can we get them togethersomehowCan we get togetherI've got this friend
