

Should Have Loved You (MD Electro Edit)

Johanna

Verse 1:

So busy chasing fire that I missed your flame

So caught up in the lights that I lost my way

Wish I'd made you stay I only felt your touch when your touch was gone

Didn't know I had your love till you moved it on

Now it's a world away Bridge 1:

And sometimes we give it up to know it's what we want

I never needed you more the moment I let you go Chorus:

Shoulda loved you when I had the chance

Wish I'd fought for you like I promised to

Shoulda loved you when I had the chance

Now you're gone all I got's a picture of you Tag:

And I hate these hands for letting you go

And I can't forgive these arms not holding you close

If I could I could get you back I would Verse 3:

What happened to the night when the stars blew out

And everything we were when the world was ours

Before it slipped away Bridge 2:

Sometimes we lose it just so we can bring it home

Never needed you more than the moment I let you go
