I Don't Mind

SuperHeavy

[Mick]
Out by the desolate shore
The waves come in with a roar
The children are playingThrowing stones in the water
Dogs are chasing
The seagulls are flickering, bickering, bickeringHorses are out in the pasture
Seeing whos running faster
And inside the house
A young girl is sewingWhat a peaceful scene
Like a faded dream
It all looks like a sepia photograph[Joss]
I dont mind
If you live in my mind
Im happy to keep you thereAnd thats fine
Oh you
Youre all that I like
And my imaginations clear
Ooh oh[Mick]
The sun shines bright on the water
I walk with my daughter
And the whole world is
Shimmering, shimmering, shimmeringI hear a church bell ring
With a kind of lilt and swing
Just then the noise of the planes
Is shattering, shattering, shatteringOut by the desolate shore
By the marshy moor
The children were playingHorses are out in the pasture
Saddled up for the master
Meanwhile the clouds are
Gathering gathering gathering[Joss & Mick]
I dont mind
If you live in my mind
Im happy to keep you thereAnd thats fine
Oh you
Youre all that I like
And my imaginations clear
Ooh oh[Damian]
And even though youre just a figment
Of my thoughts Im still loving every segment

And my imagination got me desperate
And youve already took away my next breath
Which means Im doomed from the outset
Cause Im in love without an outlet
Which means I cant make no progress
Means my ambitions are hopeless
I want to wrap around you like a necklace
But I cant, so you got me moving reckless
To you Id rather give more and take less
Cause you make me want to conquer every conquest
Im trying to tell you that I love you from the longest
Im trying to tell you that my loving is the strongest
Im trying to tell you that...
Sweet dreams are made of me
And who are you to disagree?[Joss & Mick]
I dont mind
If you live in my mind
Im happy to keep you thereAnd thats fine
Oh you
Youre all that I like
And my imaginations clearI dont mind
If you live in my mind
Im happy to keep you there
And thats fine
Oh you
Happy to, happy to keep you there
