The Gentle Approach

Goldenboy

I know I know I know, I must be dreaming
'Cause it surely feels like I am coming home
I hope I hope that you won't leave me begging
Sacrificed too much to be ending up alone
You put a spotlight on me and a smile on my face
I wish that I was clever hope I got what it takes
Whatever you do, make sure you'll walk the line
Before we're running out of time
I wish I wish that it was complicated
My approach would be more gentle if so was
I thought we found our way, here I feel jaded
Where I once thought that there's no stop in usIt's the point of no return
Hoping that we both have learned
It's our time to set it straight
Can't go on without your hand
I need you to understand that all the things I did
I did them all so we could still walk on and on and on....
