

Head First

Overkill

I push to the left, you pull to the right
It's a stand off, gainin' no ground
Out of the dark and into the lights
It's a breakthrough, startin' with sound I can't forget the look on your face
In shock, startin' to sweat
All wet, make a bet, it hasn't even started yet
But I got a nickel that says, it will Head first, head first, head first
You'll compromise, you'll let us in
You'll spread 'em wide we're divin' in
Head first, head first Climb on the horse and start to ride
Slow curves, swingin' the bat
Up down the front and side to side
Code blue, we need it stat I got the reason that makes you go
Mid air, suspended animation
Layin' down on the rug, start it with a little tug
And I got a nickel that says, you will Head first, head first, head first
You'll compromise, you'll let us in
You'll spread 'em wide we're divin' in
Head first, head first It all starts with a kiss of death
Move on, down to you knees
In head first take a deep breath
Down there, so at ease It all ends with an all out dive
This time, I think you do
Say, you will, say, ya won't, I don't care if ya don't
But I got a nickel that says, you do Head first, head first, head first
You'll compromise, you'll let us in
You'll spread 'em wide we're divin' in
Head first, head first
