

# Where Cedar Nouns and Adverbs Walk

## The Most Serene Republic

Every time we meet its always love and wine  
The trees make our bathetic talk  
Where cedar nouns and adverbs walk With beetles as the backup band  
The flightless cheering in their stands  
The empty swing sets hushed reprise  
Makes that first language thick as spies Lets relearn every vowel and phrase  
And make it better than before  
Lets relearn every vowel and phrase  
And make it better than before I think you know why, what to do  
Rules of it are so damn cruel  
I think you know what to do  
The rules of it are so damn cruel  
I think you know why, what to do  
The rules of it are so damn cruel Now let's make our lips an accident  
On the corner of came and went  
Well merge in gymnastic flips, spirographs  
Well forget what the future has Well take the day off, let's take the day off  
Lets' take the day off, let's take the day off I think we all know the words  
I think we all know the words  
I think we all know the words  
I think we all know the words I think we all know the words  
I think we all know the words  
I think we all know the words  
I think maybe we all know the words I think we all know the words  
I think we all know the words  
I think we all know the words
