

# Miracles

## Mambo Sauce

You ever seen a brother or sister who could cure a disease  
I hadn't but I wanted to  
Show the world that nothing's impossible if they can believe  
They're gonna see a miracle  
I didn't know what to do  
So I went running to you  
To find that cure  
Now I know for sure...  
I'm done looking around  
I finally figured it out  
It's more than metaphysical  
You got me up from down  
Faith has shattered my doubts  
I believe in miracles  
I knew what I wanted to do but just like gravity's pull  
I always did the opposite  
Life was a meaningless party  
I started to fall into a bottomless hole  
But then I got a miracle  
Some people don't have a clue  
If all of this could be true  
But take a look at me  
I was blind but now I see

I'm done looking around  
I finally figured it out  
It's more than metaphysical  
You got me up from down  
Faith has shattered my doubts  
I believe in miracles  
There's something that's missing  
If we can't recognize  
That our own existence  
Is the miracle before our eyes  
I'm done looking around  
I finally figured it out  
It's more than metaphysical  
You got me up from down  
Faith has shattered my doubts

I believe in miracles  
I'm done looking around  
I finally figured it out  
It's more than metaphysical  
You got me up from down  
Faith has shattered my doubts  
I believe in miracles  
It's more than metaphysical
