

# Crystallized

## Sigmatropic

Crawl back to life,  
It's been far too long  
Crystallized  
Round interstellar moons  
Seed of light into your atmosphere  
What's your world like?  
Is the house we've built still here?  
Girl you know When the beat of my drum  
Meets the beat of your heart  
You know I couldn't love any other, any other  
This is where I come from  
This is where I belong,  
With the beat of your drum  
Not any other Fall through the sky  
Little specks below  
Magnify, the further down I go  
I feel it in my bones  
Can you feel too?  
Is this the world I know?  
Is the house we've built still here?  
Is the human race sincere? When the beat of my drum  
Meets the beat of your heart  
You know I couldn't love any other, any other  
This is where I come from  
This is where I belong,  
With the beat of your drum  
Not any other Feel the force of time  
Weighing down my mind  
Tears you cry, screaming at the sky  
Come outside,  
The rays are shining bright Not any other  
Feels like home  
Where I belong  
Oh oh When the beat of my drum  
Meets the beat of your heart  
You know I couldn't love any other, any other  
This is where I come from  
This is where I belong,  
With the beat of your drum

Not any other
