You're Always Pulling Me Down

UB40

I thought I knew you well, your right and wrong
Thought I could steal your secrets and put them in a song
I thought that you'd be waiting patiently for me
That only I could seeYou build me up and tell me lies
You hold my hand, say close your eyes[Chorus]
You're always pulling me down
You make me lower my expectations
You're always pulling me down
Why do you complicate situations
You're always pulling me downI don't know what else to do
I'm still in love with youI wish that I could see things through your eyes
I want to lift the veil and penetrate your lies
I want to take your truth and hold it in my hand
Maybe then I'll understandYou contradict in a thousand ways
You call the tune and guess who pays
