Afterglow

Closure

Sinking in the sunset here alone with you
A photograph so perfect we'll just stay and never move
But it comes and it goes so fast
We can make it last
Taste the summer afterglow
And take it with you when you go
Remember me when you're back in school
If you can't make it through
'Cause every moment in your life
Comes down to what you hold inside
I don't have to know you
I just wanna hold you tonight
Closer than it's ever been with anyone
Living for the moment there's a flash and then it's gone
Is it killing you like it's killing me tonight
Just remember what it's like
Remember
And you had to go
So far away, far away, far away
But you'll never be alone
