

# All Over Again

## The Shires

Back when you were younger and the summer would last forever  
Looking at you and loving you, that's the way you made me feel  
Whoa oh oh, we've been too caught up in all that stuff we call life  
It's just you and me right now I think I'm falling in love with you

All over again

I think I'm falling in love with you

All over again When you look in my eyes and it's like the first time

You gave me your heart, and you just keep giving me more

I think I'm falling in love with you

All over again Hmm, back when I didn't know every little thing about you

And I was figuring out, finding out what I'd do to make you smile, yeah

Whoa oh oh, we've been too caught up in all that stuff we call life

It's just you and me right now I think I'm falling in love with you

All over again

I think I'm falling in love with you

All over again When you look in my eyes and it's like the first time

You gave me your heart, and you just keep giving me more

I think I'm falling in love with you

All over again You know you're my my my my my baby

I know I've not not not not told you lately

But there's something about the way you look tonight

I think I'm falling in love with you

All over again

I think I'm falling in love with you I think I'm falling in love with you

All over again

I think I'm falling in love with you

All over again When you look in my eyes and it's like the first time

You gave me your heart, and you just keep giving me more

I think I'm falling in love with you

I think I'm falling in love with you

I think I'm falling in love with you

All over again

All over again

All over again
