# Space Man

## Smash Mouth

There you go around your tiny world again
Playing space man in your silver shoes
You say you want to come back down to Earth again
When you're down you find your mind and slip
There you go
Just like all the other times before
You're lost in space
Anti-gravitation keeps you high above
Like some comet speeding toward the sun

Communication's lost between the ones who love you
It's impossible to think that something loves you more than us
There you go
Just like all the other times before
You're lost in space
You're lost in space
There you go
Just like all the other times before
You're lost in space.
