

# The Middle

## Great Northern

Watch out 'cause we're troubleshooting on the weekend  
We try to connect but don't hold your breath this weekend  
Love you a little, gets you through to the middle It's a sound that you learn to hate  
We try to get to you but don't be late  
'Cause we'll love you a little, gets you through to the middle 1, 2, 3 is how you get to sleep  
But don't forget your mother while you count your sheep  
'Cause she'll love you a little, gets you through to the middle Picking up the pieces from the night  
To fall at day is how we  
Love you a little, gets you through to the middle If the summer will be easier  
To finally let me go, let me go  
Love you a little, gets you through to the middle  
Let me go  
Love you a little, gets you through to the middle Didn't mean to let you down  
Just thought you'd hang around  
But we've been waiting for so long Didn't mean to let you down  
Just thought you'd hang around  
But we've been waiting for so long Didn't mean to let you down  
Just thought you'd hang around  
But we've been waiting for so long Didn't mean to let you down  
Just thought you'd hang around  
But we've been waiting for so long
